

Start

**Draw an
Open Science
Card!**

You are told that you
have to publish an
article until the end of
the year.
Go back one space!

You make progress
with your publication.
Go forward one space!

**Draw an
Open Science
Card!**

The search for raw
data from a
publication costs a lot
of time since it is not
published in a
repository.
Miss one turn!

You find the source
code for important
research software on
GitHub.
Have another go!

Congratulations!

You successfully
published your Open
Access article.

**Draw an
Open Science
Card!**

The university grants
you financial support
for the costs of the
Open Access option of
your article.

Open Science Game

You lose important
research data because
you did not make a
proper backup.
Go back one space!

You have to read an
article but the access
requires you to pay
fees.
Go back one space!

You get access to
research data from
the participants of a
Citizen Science
project.
Go forward one space!

**Draw an
Open Science
Card!**

You make your
research data openly
available in a
repository.
Go forward one space!

Your article was
accepted by an
internationally
recognized journal.
Go forward two
spaces!

**Draw an
Open Science
Card!**

You find important
literature openly
available in Open
Access journals.
Go forward one space!

The setup of your
experiment takes
longer because the
corresponding
protocols are not
openly available.
